American taxpayers are quite interested in knowing how banks have used the money that Treasury has invested under the Capital Purchase Program (CPP) and Community Development Capital Initiative (CDCI). To answer that question, Treasury is seeking responses that describe generally how the CPP/CDCI investment has affected the operation of your business. We understand that once received, the cash associated with TARP funding is indistinguishable from other cash sources, unless the funds were segregated, and therefore it may not be feasible to identify precisely how the CPP/CDCI investment was deployed or how many CPP/CDCI dollars were allocated to each use. Nevertheless, we ask you to provide as much information as you can about how you have used the capital Treasury has provided, and how your uses of that capital have changed over time. Treasury will be pairing this survey with a summary of certain balance sheet and other financial data from your institution's regulatory filings, so to the extent you find it helpful to do so, please feel free to refer to your institution's quarterly call reports to illustrate your answers. This is your opportunity to speak to the taxpayers in your own words, which will be posted on our website.

What specific ways did your institution utilize CPP/CDCI capital? Check all that apply and elaborate as appropriate, especially if the uses have shifted over time. Your responses should reflect actions taken over the past year (or for the portion of the year in which CPP/CDCI funds were outstanding).

☒ **Increase lending or reduce lending less than otherwise would have occurred.**

Total loans outstanding declined during the period. In an effort to stabilize asset quality the bank worked to reduce exposure to commercial real estate. As outlined below significant lending activity continued throughout the period.

☐ To the extent the funds supported increased lending, please describe the major type of loans, if possible (residential mortgage loans, commercial mortgage loans, small business loans, etc.).

☐ Increase securities purchased (ABS, MBS, etc.).

☒ **Make other investments.**

Short term investments in interest bearing accounts with banks increased along with investments in US Agency Securities.

☒ **Increase reserves for non-performing assets.**

As local and national economic activity continued to decline, the bank added reserves in recognition of declining asset quality.

☐ **Reduce borrowings.**

☒ **Increase charge-offs.**

Charge-offs continued at a historically high level.

☐ Purchase another financial institution or purchase assets from another financial institution.

☒ Held as non-leveraged increase to total capital.

Increasing total capital through CPP strengthened our already solid capital ratios. The additional capital provides a cushion against further stress in the bank's commercial real estate portfolio.
